### **DETAILED ACTION**

This is in response to communication filed 09/20/05.

#### ***Response to Arguments***

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

The indicated allowability of claims 1-20, 22-29 and 31-38 are withdrawn.

Rejections based on the **35 USC § 101** follow.

#### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-38 rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. In the present case, the claimed invention does not fulfill any of the disclosed utilities as in specification, the tangible requirement is needed to satisfy the requirements of 35 U.S.C. 101, in that the claim must set forth a practical application of that § 101 judicial exception to produce a real-world result.

Therefore, tangible result is produced.

Aslo, claims 19 and 20 rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. In the present case, the claims that recite nothing but the physical characteristics of a form of energy such as a frequency,

analog or digital transmission media and analog and communication links and wireless, pre-se, and as such are nonstatutory natural phenomena, the claimed does not itself perform any useful, concrete and tangible result and thus does not fit within the definition of the machine.
